Explanation:

* **□□□□□ □□ □□□□□?**: This directly asks "What then?" maintaining the original tone of inquiry and urgency.

Explanation:

This phrase conveys a powerful and important message about the nature of addiction and brain chemistry. Directly translating "Your brain will lie to you" captures the essence without losing impact in Bengali. The chosen phrase maintains the emotional register, conveying both the deception of the brain and its profound effect on individuals struggling with addiction.
